

# Back to Basics

## Foam Application

95 GPM

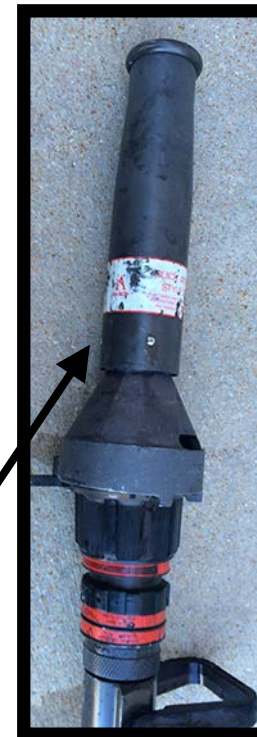

Methods to apply foam:  
Bank Down  
Roll On  
Rain Down

It is important to match the nozzle GPM with the foam educator GPM, this provides appropriate mixing and concentration

Select the appropriate foam as well as concentration for type of incident

95 GPM

The addition of a "Foam Tip" or air inductor allows for air to be added to the foam producing a better end product
