

# Back to Basics

## SCBA Confidence

FF silences alarm, (for added bonus have the FF verbally go thru MAYDAY procedure)

Start with the SCBA in full alarm mode, all straps cinched down and waist belt buckled

FF dons SCBA and tightens all straps, FF should be ready for entry into a fire

FF proceeds to loosen all straps and turns bottle on

FF attaches regulator to face piece and begins to breath air

FF should be in Full PPE, mask on and hood over mask so as to provide zero visibility. FF should also be using firefighting gloves.
